Networking With NSURLSession

Delegate vs. Closures

Completion Handlers

```swift
public func dataTaskWithRequest(request: NSURLRequest) ->
  NSURLSessionDataTask

public func dataTaskWithRequest(request: NSURLRequest,
  completionHandler: (NSData?, NSURLResponse?, NSError?) ->
  Void) -> NSURLSessionDataTask
```
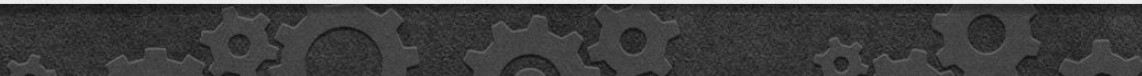

Delegate

- ⚙ NSURLSessionDelegate
  - ⚙ URLSession(_:didReceiveChallenge:completionHandler:)
- ⚙ NSURLSessionDownloadDelegate
  - ⚙ URLSession(_:downloadTask:didWriteData:totalBytesWritten:totalBytesExpectedToWrite:)
- ⚙ NSURLSessionDataDelegate
  - ⚙ URLSession(_:dataTask:didReceiveData:)
- ⚙ NSURLSessionTaskDelegate
  - ⚙ URLSession(_:task:didCompleteWithError:)
